

Bernard Gyugyi

JUNIOR FULLSTACK DEVELOPER

SUMMARY

Before the bootcamp, I worked as a project manager for a local internet provider company. My main role was to manage complex projects from start to finish, such as structured cabling, camera and alarm systems, and providing internet connections over fiber optics and wireless devices. The configuration of multiple devices motivated my new passion for coding.

MOTIVATION

As a junior full-stack software developer, I am ready to tackle the upcoming challenges with the skills I learned at a bootcamp and my previous experience as a project manager. I am confident that my passion for software technologies, problem-solving, and creative thinking will keep me on the path of progression. I am excited to collaborating with a team, move forward in my career and solve complex projects.
